# Overview

## **Welcome to SRS Group.**

SRS Group of companies is now delivering our clients the services and support needed to complete your next structural remediation project.

Over the past 20 years of working within the sector, significant technological developments, remediation techniques, construction-chemical, and coating systems have occurred. SRS Group works with industry leaders in supplying products to industry while ensuring suitability in application.

# About SRS Group

**SRS Group has over 20 years of industry experience in concrete and structural steel remediation inspection, development of repair methodologies and project execution.**

The industries we service include mining, marine and ports, oil and gas, sugar mills, process and refineries, power generation, construction and general engineering and fabrication.

## Our Vision

To be recognised as a leader in Structural Remediation Inspections and development of repair and protection practices of critical infrastructure through technology and product development.

## Our Values

To maintain integrity/honesty and value as a company while focusing on delivering results.

### SRS Consultancy

SRS Consultancy's professional services are designed to cater to the needs of all structural remediation projects, providing comprehensive support throughout the delivery process.

### Corrosion Coating Solutions

While working with industry-recognised coating and construction chemical suppliers, Corrosion Coating Solutions offer a turn-key solution for your corrosion and coating materials, preparation and application equipment requirements.

### EonCoat

EonCoat's Corrosion Protection Coating is our flagship product and an incredibly effective way to permanently protect carbon steel from corrosion.

### Airblast Australia

Helping Australia's contractors find the right products for all surface preparation applications. With 2500+ products available online, we're the first choice for professional blasting and coating contractors.

## A TURN-KEY SOLUTION FOR YOUR STRUCTURAL REMEDIATION REQUIREMENTS

SRS Consultancy is locally owned and operated and services Australia and abroad.

The company has been established to service contractors and asset owners in relation to structural remediation.

**This means we are providing our clients with a service that is not only scientific / engineered but also practical in execution.**

*We look forward to assisting you with your next project.*

### Why us?

- ✓ *Maintaining company value which are consistent with the company vision*
- ✓ *The right person for the job*
- ✓ *Compliance to all standards and specifications noted*
- ✓ *Value for money*

## Professional Services

SRS Consultancy Professional Services are structured to support our client's requirements in delivering any structural remediation projects. Our professional services include site and office-based services to ensure a turn-key solution for your structural remediation requirements.

### Our Services

- Third Party Inspection (Quality/Assurance)
- Desktop Reviews (Coating QA Documentation/Coating Specification/Audits & Inspections)
- Abrasive Blasting & Coating Application Scope Of Work Development
- Compliance Review (Abrasive Blasting & Coating Practices) HSEQ Focused
- Project Management (Abrasive Blasting & Coating Projects)
- Project Management (Concrete Remediation Projects)
- Supervision (Abrasive Blasting & Coating Projects)
- Supervision (Concrete Remediation Projects)
- Project Mobilization Management
- Corrosion & Coating Inspections/Audits
- Specific Training and Endorsement Of Coating /Treatment Systems
- Destructive & Non-Destructive Coating Assessments
- Laboratory Testing Of Coating Materials & Abrasives
- Concrete Remediation Scope Of Work Development
- Third Party Engineering/Consultancy (Site/Office Based)
- Concrete Structure Inspection/Assessment To Develop Feasibility Of Repair/Replacement

# CORROSION COATING SOLUTIONS

## YOUR INDUSTRY PARTNER FOR ALL CORROSION AND COATING REMEDIATION PROJECTS

---

At Corrosion Coating Solutions, we aim to provide superior quality products by leveraging cutting-edge technology and advanced materials in the corrosion and coating industry.

We are committed to delivering honest and reliable solutions to our clients through a scientific and engineering-driven approach. Our goal is to be at the forefront of the market by continuously introducing innovative technologies that enhance the coatings and concrete repair industry.

*"The industries we service include mining, marine and ports, oil and gas, sugar mills, process and refineries plants, power generation, construction, general engineering, and fabrication."*

### Why us?

- ✓ *We work with contractors and their applicators to improve the health and safety of all personnel working within the remediation project*
- ✓ *Honest communication and dealings with all suppliers*
- ✓ *Delivery of materials, equipment and consumables to ensure project completion on time and budget*
- ✓ *Value for money*

## Innovative technologies that enhance the coatings industry

While working with industry-recognised coating and construction chemical suppliers, Corrosion Coating Solutions offers a turn-key solution for your corrosion and coating materials, preparation and application equipment requirements.

### Our Mission

To maintain integrity/honesty and value as a company while focusing on delivering results, technology and product development.

### Our Values

- Openness and Honesty
- Conducting business ethically
- Delivering the correct information required to our clients
- Longevity in all of our relationships with clients, suppliers and there operational staff

# EONCOAT™

## EONCOAT'S CORROSION PROTECTION COATING

**Our flagship product is an incredibly effective way to permanently protect carbon steel from corrosion.**

As the foundation of all our products, EonCoat Corrosion Protection is spray applied at a 1:1 ratio to form the two-component protective coating for carbon steel. Once this product is mixed and applied to the carbon steel, a chemical reaction creates two layers of corrosion protection. One layer is iron phosphate, and the other is ceramic filled with phosphate. These two layers are the key to permanent corrosion protection.

## EONCOAT WELDABLE COATING

What sets EonCoat Weldable Coating apart from the others is its ability to protect carbon steel from corrosion before and after the welding process.

## EONCOAT CUI COATING

EonCoat's CUI (corrosion under insulation) Coating works just like our EonCoat Corrosion Protection Coating by alloying the carbon steel after one application lays down both layers of protection.

# AUSTRALIA AIRBLAST

## SURFACE TREATMENT PROFESSIONALS

Established in 1974, Airblast has consistently been an industry leader in providing surface preparation and coatings application solutions to a wide range of industries. We have an unparalleled network of offices in eleven countries, enabling Airblast to supply and service an extensive range, incorporating the best brands in our industry.

The Airblast group of companies is made up of well-established and trusted business', incorporating Blastman Robotics, Sybrandy and Airblast Abrasives, ensuring that we remain on the cutting edge.

Airblast work closely with our customers and distribution partners, providing proven, off the shelf, as well as design and development of customised solutions to take on the most challenging applications.

**With offices in Perth, Brisbane and Melbourne,  
we've got Australia covered!**

Airblast is dedicated to maintaining a profitable organisation on a long-term basis through ethically and morally sound business practices. Airblast believes that we can share sustained mutual success by investing in the long-term future of our organisation and those with whom we conduct business.

Our manufacturing facilities in Europe and the Far East produce fit-for-purpose quality products with region-specific certification. All Airblast equipment is manufactured according to the highest relevant safety standards and passes our rigorous quality controls before dispatch.

Mindful of the environmental responsibilities faced by our generation, Airblast is committed to a programme of research and development into technologies facilitating zero emission blasting and painting along with an education programme promoting planet-friendly operations. With the ability to purchase through all the major suppliers, we offer a turn-key solution for your corrosion and coating material, preparation and application equipment needs.
